

11+ CEM Non-Verbal Reasoning Practice Assessment Tests for Ages 10+

The 11+ Common Entrance Exam (CEM) is a highly competitive entrance exam that students in England and Wales take to gain admission to selective secondary schools. The CEM exam consists of four sections: English, Mathematics, Verbal Reasoning, and Non-Verbal Reasoning. Non-verbal reasoning is a type of reasoning that does not involve the use of words. It is a measure of a student's ability to think logically and solve problems using visual and spatial information.

Non-verbal reasoning questions can be challenging, but with practice, students can improve their ability to answer them correctly. One of the best ways to prepare for the CEM 11+ Non-Verbal Reasoning section is to take practice assessment tests. These tests can help students to identify their strengths and weaknesses, and to develop strategies for answering different types of questions.

The following are 11+ CEM Non-Verbal Reasoning practice assessment tests for ages 10+. These tests have been designed to provide students with a realistic experience of the CEM 11+ Non-Verbal Reasoning section.

11+ CEM Non-Verbal Reasoning Practice Book & Assessment Tests - Ages 9-10 : perfect preparation for the eleven plus (CGP 11+ CEM) by CGP Books

★★★★☆ 4.8 out of 5

Language : English

Print length : 120 pages

Here are some tips for answering non-verbal reasoning questions:

- **Look for patterns.** Many non-verbal reasoning questions involve identifying patterns. For example, you might be given a series of shapes and asked to identify the next shape in the series. To answer this question, look for a pattern in the shapes. For example, the shapes might be getting larger or smaller, or they might be changing color.
- **Use your spatial reasoning skills.** Non-verbal reasoning questions often involve spatial reasoning skills, such as the ability to rotate objects in your mind or to see things from different perspectives. For example, you might be given a cube and asked to identify the shape that would be formed if the cube were unfolded. To answer this question, you need to be able to rotate the cube in your mind and to see it from different perspectives.
- **Don't be afraid to guess.** If you're not sure of the answer to a question, don't be afraid to guess. You might get lucky and guess the correct answer.

Taking practice assessment tests is one of the best ways to prepare for the CEM 11+ Non-Verbal Reasoning section. By taking practice tests, students can improve their ability to answer different types of questions and develop strategies for answering questions correctly.
