

# Equipment Of Aircraft Yak Factory Manual

The Yakovlev Yakovlevich Yakovlev Design Bureau (OKB Yakovlev) is a Russian aircraft design bureau founded in 1927. The bureau is best known for its fighter aircraft, including the Yak-1, Yak-3, and Yak-9. OKB Yakovlev also designed a number of other aircraft, including the Yak-40, Yak-42, and Yak-52.

The Yak Factory Manual is a comprehensive guide to the equipment of aircraft produced by OKB Yakovlev. The manual covers a wide range of topics, including:

\* Aircraft history \* Aircraft design \* Aircraft specifications \* Aircraft equipment

The Yak Factory Manual is an essential resource for anyone interested in the history, design, or operation of aircraft produced by OKB Yakovlev.

## **History of OKB Yakovlev**

OKB Yakovlev was founded in 1927 by Yakovlev Yakovlevich Yakovlev. Yakovlev was a talented aircraft designer who had previously worked for the Tupolev Design Bureau. In 1927, Yakovlev left Tupolev to start his own design bureau.

OKB Yakovlev's first aircraft was the AIR-1, a small single-seat fighter aircraft. The AIR-1 was followed by a series of other fighter aircraft, including the Yak-1, Yak-3, and Yak-9. These aircraft were successful in combat during World War II and helped to establish OKB Yakovlev as a leading aircraft design bureau.

After World War II, OKB Yakovlev continued to design fighter aircraft. However, the bureau also began to design other types of aircraft, including passenger aircraft, cargo aircraft, and trainers. In the 1960s, OKB Yakovlev designed the Yak-40, a regional jet airliner. The Yak-40 was a successful aircraft and was exported to a number of countries.

In the 1970s, OKB Yakovlev designed the Yak-42, a medium-range jet airliner. The Yak-42 was also a successful aircraft and was exported to a number of countries. In the 1980s, OKB Yakovlev designed the Yak-52, a basic trainer aircraft. The Yak-52 is still in use today by a number of air forces around the world.

Today, OKB Yakovlev is a leading aircraft design bureau. The bureau continues to design and produce fighter aircraft, passenger aircraft, cargo aircraft, and trainers.

## **Design of OKB Yakovlev Aircraft**

OKB Yakovlev aircraft are known for their clean lines and efficient designs. The bureau's aircraft are typically made of lightweight materials, such as aluminum and composite materials. This helps to reduce the weight of the aircraft and improve its performance.

OKB Yakovlev aircraft are also known for their advanced avionics systems. The bureau's aircraft are equipped with the latest navigation, communication, and weapons systems. This helps to improve the safety and efficiency of the aircraft.

### **Specifications of OKB Yakovlev Aircraft**

The specifications of OKB Yakovlev aircraft vary depending on the type of aircraft. However, some of the most common specifications include:

\* Wingspan: 8.75 m (28.7 ft) \* Length: 9.6 m (31.5 ft) \* Height: 3.2 m (10.5 ft) \* Weight: 2,500 kg (5,500 lb) \* Engine: 1 x Klimov VK-107A turbofan engine \* Maximum speed: 900 km/h (560 mph) \* Range: 1,500 km (930 mi) \* Ceiling: 12,000 m (39,000 ft)

### **Equipment of OKB Yakovlev Aircraft**

The equipment of OKB Yakovlev aircraft varies depending on the type of aircraft. However, some of the most common equipment includes:

\* Radar \* Missile launchers \* Bombs \* Rockets \* Machine guns \* Cannon \* Navigation systems \* Communication systems \* Weapons systems

The Yak Factory Manual provides detailed information on the equipment of aircraft produced by OKB Yakovlev. The manual is an essential resource

for anyone interested in the history, design, or operation of aircraft produced by OKB Yakovlev.

OKB Yakovlev is a leading aircraft design bureau. The bureau has a long history of designing and producing successful aircraft. The Yak Factory Manual is a comprehensive guide to the equipment of aircraft produced by OKB Yakovlev. The manual is an essential resource for anyone interested in the history, design, or operation of aircraft produced by OKB Yakovlev.
