\* Exposure to loud noise \* Earwax buildup \* Ear infections \* Meniere's disease \* Otosclerosis \* Acoustic neuroma \* Head injury \* Neck injury \* TMJ disorders \* Stress \* Anxiety \* Depression

## Symptoms of Tinnitus

The symptoms of tinnitus can vary from person to person. Some people may only experience tinnitus occasionally, while others may experience it constantly. The loudness of tinnitus can also vary from person to person. Some people may only experience a mild ringing in their ears, while others may experience a loud buzzing or hissing sound.

In addition to the ringing, buzzing, or hissing sound, people with tinnitus may also experience other symptoms, such as:

- \* Difficulty sleeping \* Difficulty concentrating \* Fatigue \* Irritability \* Anxiety
- \* Depression

#### **Treatments for Tinnitus**

There is no cure for tinnitus, but there are a number of treatments that can help to reduce the symptoms. Some of the most common treatments include:

\* Tinnitus retraining therapy (TRT) \* Cognitive-behavioral therapy (CBT) \* Sound therapy \* Masking devices \* Medications \* Surgery
